Addendum to the
Facilities and Administrative Costs Policy

The Office for Research and Sponsored Projects proposes the following guidelines for the
distribution of Facilities and Administrative Costs (also known as F&A or Indirect Costs) and
emend the current F&A policy with the language below:

In the absence of any agreement to the contrary, on projects where two or more individuals are
listed as co-Principal Investigators and the budget includes more than $5,000 of indirect costs,
   a. separate discretionary accounts should be established for each co-PI,
   b. the F&A cost recovery should be divided between the co-PIs proportional to their
      grant-funded effort, and
   c. the F&A cost recovery should be divided between the colleges/units involved
      proportional to the grant funded effort of their co-PI.
