

LMU|LA Center for Urban Resilience

2018-2019 Environmental Lecture Series

Presented by the LMU Center for Urban Resilience
in partnership with

LMU Environmental Science Program & LMU Urban and Environmental Studies

We are living in an unprecedented time of social and environmental change. In order to work towards a resilient future, it is important to understand the complexity of global and local environmental issues and use that information as a foundation to build solutions. Now in its second year, this lecture series aims to engage the LMU community in the range of environmental research studies and projects being conducted on and off-campus.

All lectures are from 4:30-5:30pm unless noted.

Fall 2018 Lectures

Dr. Chelsea Robinson
LMU Urban and Environmental Studies
"Landscape Patterns of Diversity, Wood
Density, and Protected Areas in Forests of
Costa Rica"
